WIDE RANGE OF PHARMACEUTICALS

At Imres we have the widest range of generic and branded pharmaceuticals for any health programme in the market. Our range is based on the WHO list of essential medicines, but goes much further than that. Our aim is to supply the right medicines, in the right form, at the right time for your health programme.

We distribute our own Imres range of high quality, affordable generic pharmaceuticals. They are specially developed for the hospital and pharmacy market and distributed worldwide. The "Distributed by Imres" products are labelled in English, French, Spanish and Portuguese. We always keep sufficient stock of this range for immediate dispatch. In addition to this, Imres has an extensive range of other generic and branded pharmaceuticals.

To safeguard the quality of our pharmaceuticals, we continuously have GMP audits conducted by our qualified pharmacists, along with re-analysis and contra-analysis of pharmaceuticals.

ONE-STOP-SHOP

Imres maintains minimum stock levels of pharmaceuticals at all times. These pharmaceuticals are stored in our climate controlled GDP-certified warehouse in the Netherlands, where we monitor the expiration dates to ensure a sufficiently long shelf life upon shipment.

While more than 35 years of experience has enabled us to identify the best and most reliable suppliers for each of our products, Imres strives to continuously improve, expand and innovate. We constantly source new products and suppliers. This ensures that we keep our range up to date, and that we consistently provide our customers with the best prices, products and quality.

THE IMRES DIFFERENCE

+ Over more than **35 years**, Imres has proved that we are a **reliable, efficient and trusted partner** in **healthcare strengthening programmes** in developing countries.

+ As an organisation, we are big enough to **make a difference**, but small enough to give our customers personal attention, and to care about the difference that we are making in lives and communities, and in our partners' health projects.

+ We have **offices and facilities** in the **Netherlands, Dubai, India, Canada, China** and the **Democratic Republic of Congo**.

+ Our **production areas** include a **GMP room** for secondary packing and a **Class D clean room** for primary packaging, as well as a **450 m² kit production area**. As a supplier, we do not make promises that we cannot keep. If we commit to a project and specific deliverables, it is because we really can deliver, as promised.

+ Like the projects that we are **proud** to be part of, Imres has heart. We are good at what we do, but we also feel good about what we do. We feel responsible for our partners' projects until each one ends **successfully**.

+ Then we move onto our **next challenge**; our next opportunity to turn humanitarian dreams into **concrete solutions** and **decisive action** that saves lives.
